EXPERIENCE

Paper Trading Algorithm

HTTPS://GITHUB.COM/TOLTALCHAOS/TRADING-ALGO

Experimental C# .Net Framework console application designed to dynamically buy and sell stock shares interfacing with an Alpha Vantage API for market data using windows server SQL to store data in a relational database.

Review API + APP

github.com/toltalchaos/GreenReview-API-projet2

Designed and implemented a comprehensive set of projects designed to illustrate competency using a React stack as well as vanilla JavaScript with Googles firebase working in the back end.
The goal is to create, deliver, and maintain a flat-file database. The API is focused on reviewing products in a clean user-friendly manner.

Personal Experience

Designed and managed many other projects and assisted in managing open source contributors through a variety of group based goal oriented rapid prototyping environments. Requiring a high attention to detail and flexibility to innovate and problem solve with a team using effective communication techniques.

SKILLS

- C#
- JavaScript
- SQL/PLSQL/NoSQL
- GIT(DVCS)
- HTML5
- CSS3
- React, Svelte, Angular
- Adobe Suite
- Microsoft Office

EDUCATION

Computer Software Development Diploma

NAIT 2021

Received comprehensive training in multiple programming interfaces and languages. As well as a full-scale implementation of an agile development project.
